

CORONAVIRUS (COVID-19)

Why do I have to stay at home?

Sometimes people get sick.
People get sick from germs.

People stay at home when they are sick. They don't want to spread the germs.

Right now, there is a germ called Coronavirus that is making a lot of people sick.

Our governor is making everyone stay home until everyone is safe.

That way, no one will get sick or pass the Coronavirus germs.

This means that I won't go to school/work for a while.

Also, I won't go to restaurants right now.

This might make me sad because I can't go to my favorite places.

But my family will find fun things for me to do at home.

If the Coronavirus germs keep spreading, we might have to stay home after April 7th.

When the Coronavirus germs are gone, I can go back to all of my favorite places.
